SOFTKLIX[®] Quick Installation Guide

Copyright (C) 2019 by SOFTKLIX Corporation

Release date: 10-12-2019

Preamble

With this Quick Installation Guide, you can independently install **SOFTKLIX** Virtualization Servers and everything you need to run and enable **SOFTKLIX**.

Please note a **SOFTKLIX** subscription license must be purchased first via the **SOFTKLIX** shop. The user will then receive personalized access from the **SOFTKLIX** team (contact details e.g. name / billing address / email etc.).

Important: To enable the download process and for further instructions, you have to login to the **SOFTKLIX** user portal. Here you can download new releases, important notes and Admin Guides/Instructions etc.

From October 2019, **SOFTKLIX** will also offer installation and maintenance services via our shop as we are always there when you need us!

Thanks for choosing **SOFTKLIX**!

Step 1: Download the latest SOFTKLIX Setup file.

Log-in at the users portal with your registered name and download the **SOFTKLIX** Setup-file from <u>www.softklix.com</u> web-page. You are only getting a valid user portal account, if you are buying the product. We strongly recommend to check before installation the system requirements and license recommendations for this software under the following <u>link at our homepage</u>

Step 2: Begin the Installation Process

After downloading the file, open the 'Downloads' folder.

4 🗼 Downloads	S SOFTKLIX GO/PRO	1-10-2019	Application	135 MB

Double-click on 'SOFTKLIX GO/PRO' to begin the installation process.

Note: The Setup file **SOFT**KLIX GO/PRO is used for the products **SOFT**KLIX **GO** and **SOFT**KLIX **PRO**. The only difference is the license key, which you have purchased. You can order and license both products and keys.

Step 3: Install SOFTKLIX

Click 'Next' when prompted during the following screen shots to progress the installation process and complete a <u>single-host</u> installation scenario.

he SOFTKLIX p Wizard ill install SOFTKLIX on your t to continue or Cancel to exit the Setup
ill install SOFTKLIX on your t to continue or Cancel to exit the Setup

Note: Release numbers are changing from time to time.

Please always use the latest release, which you can download from: www.softklix.com.

Step 4: End User License Agreement

Read/Print the End User License Agreement, accept the terms, and click 'Next'

B	SOFTKLIX 4.2.968 Setup –	×
End-User Lic Please read th	c ense Agreement le following license agreement carefully	
ENDUSE	R LICENSE AGREEMENT (EULA)	^
IMPORTANT-PL USING THE SOF BOUND BY AND ("EULA") FOR L YOU DO NOT AC INSTALL, COPY THE UNUSED SO TO YOU WITHIN	EASE READ CAREFULLY: BY DOWNLOADING, INSTALLING, OR TWARE, YOU (THE INDIVIDUAL OR LEGAL ENTITY) AGREE TO BE ACCEPT THE TERMS OF THIS END USER LICENSE AGREEMENT LICENSED SOFTWARE FROM SOFTKLIX ("SOFTKLIX"). IF GREE TO THE TERMS OF THIS EULA, YOU MUST NOT DOWNLOAD, r, OR USE THE SOFTWARE, AND YOU MUST DELETE OR RETURN OFTWARE TO SOFTKLIX OR THE COMPANY THAT SUPPLIED IT N THIRTY (30) DAYS AND REQUEST A REFUND OF THE LICENSE AT YOU FOR THE SOFTWARE	¥
1 I accept the te	erms in the License and Subscription Agreement	
	Print Back Next Cano	el

Step 5: Choose and confirm Installation Options

謬	SOFTKLIX 4.2.968 Setup – 🗆 🗙							
Cus Se	Custom Setup Select the way you want features to be installed.							
Cli	Click the icons in the tree below to change the way features will be installed.							
1	Icense and Deployment Server Application/VDI Server Application Launcher with Deplo The Application/VDI Virtualisation connection is not possible without a license and the deployment (L & D) server on a unique central comput This feature requires 7012/KB on your hard drive. Server sequire 240MB on your hard drive.							
Back Next Cancel								

Choose the role of your Computer (License/Deployment Server, Virtualization Server or Application Launcher/Access Client) and click 'Install'. You're now ready to go!

Step 6: Update or New Installation (only if your software is already installed)

Choose if you want to update your existing **SOFT**KLIX software or remove all services as well as the License key, if this computer is also the license server. Then click 'Next"...

闄	SOFTKLIX 4.2.968 Setup – 🗆 🗙
	Central License & Deployment Center Server Do you want to use your database?
	Software License and Deployment Center Database from previous installation exist. Do you want to reuse it?
1	Keep your Software License and Deployment Center Database
	O Clear your Software License and Deployment Center Database
	Back Next Cancel

Step 7: Choose/Connect your Deployment Center Server

If you have chosen to install the services for the "SOFTKLIX Virtualization Server", you need to assign these servers to the correct Deployment Center Services. There are two options: "Connect to local host" or type in the IP-address of your existing Deployment Center Server:

谬	SOFTKLIX 4.2.968 Setup – 🗆 🗙						
	Central License & Deployment Center Server Provide virtualization host address for "new" Server						
	For proper operation this Server need connection to the central License and Deployment Center Server. This Server will be installed on local computer, change now, if this Server need to connect to different License and Deployment Center Server.						
	Connect to host on this machine (Deployment Center Server/Host)						
	Back Next Cancel						

Step 8: Start the Installation process

Start the SOFTKLIX Software and click "Install"

闄	SOFTKLIX 4.2.968 Setup – 🗆 🗙
Ready to inst	all SOFTKLIX
Click Install to be installation setting	gin the installation. Click Back to review or change any of your gs. Click Cancel to exit the wizard.
	Back 🚱 Install Cancel

Step 9: Reboot after completing the installation

After completing the installation process, click 'Finish' to reboot your computer.

The computer must now be rebooted as this will enable and start the relevant SOFTKLIX services.

1	SOFTKLIX Setup				
1	You must restart your computer for the system configuration to take effect. Click Yes to restart now or No if you plan to manually restart later.				
	Yes No				

Step 10: After Reboot, login and begin maintenance set up process.

Maintain your SOFTKLIX server(s) via the SOFTKLIX Deployment Center tool

To manage and maintain your **SOFT**KLIX Virtualization Servers, start your Web-Browser and type in: "localhost:5000" or the IP-address of the **Deployment Center** Server. You will also need to add the port "5000", e.g. 192.168.2.123:5000:

Then, type in the default administrator with the following default credentials:

Important: Change the default admin password and do not work as a **SOFT**KLIX user with the admin user-profile at all. Just use this profile for administration and not as a user profile (in this case, it does not allocate any user license key).

Your default password: Due to some new laws and regulations, we are no longer able to publish the default password in our Quick Installation Manual. You will get the password in a separate mail, if you have ordered the product from partners or our homepage.

After correct login, you will see the **Deployment Center** tab the in the right top corner:

? 😤 🙁 -
admin
💄 User settings
🏟 Deployment Center
🕩 Logout

Choose the **"Deployment Center"** management tool tab. It is here that you will be able to add [**New Users**], [**Groups**], [**Enable or Disable and synchronize virtualization servers**] and much more. For further details, please download the Admin guide documents from: www.softklix.com

Step 11: Enable SOFTKLIX Subscription Licensing (Online)

Manage User licenses in the **Deployment Center** management tool:

Double click on "System" ...

Choose "System" and associated "Licenses".

1. Then click on "Enter License Key" :

– Li	- Licenses						
Vie	w licenses a	and add new ones.					
	Туре	Issued on	Expires on	Licenses	Status		
	Enter I	License Key					

Note: This number is unique and cannot be used on other computers or virtual images, it will not work. This is because **SOFT**KLIX uses this unique number as a digital fingerprint for copy protection. Second: You need to have proper internet connection, otherwise you are not able to license this key.

QIG – **SOFT**KLIX Glossary

1. **SOFT**KLIX Virtualization Server GO and PRO

SOFTKLIX is a fully integrated, easy to install and easy to use, Windows software virtualization platform, that delivers virtual Applications and Desktops via Windows Servers (either on-premise or in the cloud) or Desktop Operating Systems (refer to this link: <u>SOFTKLIX system requirements</u> or under www.softklix.com) to any Windows 32-/64-bit endpoint device (client) and other endpoint devices through an HTML5 compatible browser. **SOFT**KLIX not only increases data security and reduces costs significantly, but it also helps to increase user productivity. **SOFT**KLIX automatically includes a driverless LAN or Cloud Printing system that enables users to print from any Windows endpoint devices (XP-SP3 or better) as well as over via HTML5 browsers.

SOFTKLIX 3-in-1 Virtualization 'a la carte' – choose yours!

While other vendors license their Virtualization products individually, hiding/adding costs and charging extra each time, **SOFT**KLIX delivers the best product with the best price-performance ratio available today.

A **SOFT**KLIX 3-in-1 license comes with the option to choose which virtualization solutions suits your needs (on-premise or cloud or both in a mix/hybrid). Each license can be mixed and matched at no extra cost:

- Multi-User: Virtual Windows Application Computing (for many users, sharing one or multiple clustered hosts, includes host/App Redundancy)
 Multi-User: Virtual Windows Desktop Computing
- Multi-User: Virtual Windows Desktop Computition (for many users, sharing one Windows host)
- Single User: Virtual Windows Desktop Computing (VDI mode) (one user per remote or physical Windows PC or Windows virtual hypervisor image)

With **SOFT**KLIX, the administrator decides which the best approach for the organization is and this all depends on the available resources and the needs of the user. **SOFT**KLIX *GO* and **SOFT**KLIX *PRO* are unique as **SOFT**KLIX is the only vendor that manages and offers three unique ways of delivering Windows and Application virtualization.

2. SOFTKLIX GO and SOFTKLIX PRO differences

Both SOFTKLIX GO and SOFTKLIX PRO are virtually identical. Both are fully executable, but.....

SOFTKLIX *GO* is the most affordable and complex-free, entry-level Virtualization solution available today. It contains the outstanding & unique 3-in-1 SOFTKLIX virtualization software, a Windows Access Client, the Deployment Center Management tool and the Web Workspace for Virtual Applications. SOFTKLIX *PRO*, is also very affordable, and contains SOFTKLIX *GO*. However, it also includes an additional Access Client for browser-based computing (including a Web Gateway Server for SSL encryption), and SOFTOFFICE. SOFTOFFICE is licensed for free within SOFTKLIX *PRO* and is a 100% compatible alternative to similar expensive solutions delivered by Microsoft e.g. Office 365 or Microsoft Office 2019 (Pro).

QIG – **SOFT**KLIX Glossary

3. SOFTKLIX Deployment Center Server and Management:

The **Deployment Center** enables an administrator that wants quick access to immediately change and distribute everything at a glance and remotely. Depending on the number of licenses purchased, any number of users can be created in seconds and/or synchronized from any existing Active Directory server(s).

The **Deployment Center** Management tool centrally manages all virtual **SOFT**KLIX licenses, multiple Application Servers, Virtual Desktops (VDI Windows Computing), large number of Windows users and any applications residing on Servers, Groups, Assignments and System settings.

The **Deployment Center** interface has been designed to be very easy to use, as all settings are both logical and intuitive. Technically, the **Deployment Centre** is where all Applications, previously installed on any Windows server(s), are managed. This means it is now no longer necessary to mange any Windows settings. Once set-up correctly, administrators can remotely manage and maintain many servers at different locations and from any endpoint device via the internet. Again, no training is necessary.

More details about the features and functions for the **SOFT**KLIX Deployment Center Management Tool, refer to the support section of: www.softklix.com.

4. SOFTKLIX Web-Login and Web-Workspace

Users access their Applications and Desktop, via the **Web-Workspace** after passing through the Web-Login security portal. A modern, unified and logically designed web interface is accessed, that provides the user with only the exact Applications and Tools required and which the administrator has preset in the **Deployment Center**. There is no need for any additional training as only a good working knowledge of Windows is required. More details about the features and functions for the Web-Login and Web-Workspace, refer to the support section of: www.softklix.com

SOFTKLIX Web-Login (http:// or https://)

SOFTKLIX Web-Workspace (App Virtualization)

With **SOFT**KLIX Virtualization Servers, the most diverse scenarios can be realized easily and quickly.

Here are the most important options:

1. Windows Application Server(s) + Deployment Server (on-premise)

Remote Web-based Management: Users/Groups/Apps/Servers....

2. Windows Application Server(s) + Deployment Server (WAN/Cloud):

Remote Web-based Management: Users/Groups/Apps/Servers...

3. Multiple clustered Win Application host(s) in a mix: Cloud/on-premise:

Remote Management: Users/Groups/Apps/Servers...

Clustering multiple hosts (AppServers)

4. Windows Virtual Desktop (multi-user mode), LAN/on-premise:

Remote Management: multiple users share one Windows host (LAN/on-premise)

5. Windows Virtual Desktop (multi-user mode), WAN/Cloud:

Remote Management: multiple users share one Windows host (Cloud)

6. Windows Virtual Desktop (multi-user mode) connected to AppServer(s):

Remote Management: multiple users share one Windows host combined with AppServer(s).

7. Windows VDI-Computing (W7/8.x/10, W2012R2/W2016) running in hypervisors

8. Combined: Cloud/On-premise Application Servers feed Windows VDI-Computing Instances:

The above are only a sample of the possible combinations available.

Different application servers in other subnets can also be combined to speedy scaling.

SOFTKLIX is low cost, flexible and constantly evolving. Stay tuned.
